

PALLET DIVIDER SHEETS

BESKIDY cardboard products are the best solution available on the market for protecting surfaces during renovation and construction works. They are also widely used in logistics for securing many types of transported goods.

Thanks to their textile fiber content, they are characterized by very high absorbency, flexibility and durability, which provides an unquestionable advantage over competing products. BESKIDY cardboard products are the perfect solution for both professional and household applications. They ensure workplace comfort, safety and significant time savings.
